

“Take care of yourself.”

Jason Barber,
Service Manager, Townsville

Zero injuries and lost time are what Jason Barber strives for.

“I always tell the guys, ‘If you don’t feel safe, don’t do it. Get on the phone, and we’ll solve it.’”

Jason recently attended Apex Fenner’s Splicing School in Melbourne. “I already knew how to splice a belt. Now I know exactly why we do it that way,” he says.

Apex Fenner set up the Splicing School to enhance skill levels and improve understanding of what makes a good vulcanised join. The course covers every type of splice – ply step, solid woven PVC, and steel cord.

Having successfully completed the School, Jason now has a Level 3 Splicing Certificate, the highest qualification achievable.

Apex Fenner is renowned for its technical training and safety record. We don’t cut corners.

Jason manages technicians who typically work at your place, not ours. So they are responsive to your safety codes and needs, as well as ours.

When it comes to change outs and installation, our highly qualified technicians follow strict safety procedures, particularly during shutdowns.

To contact your local Apex Fenner belting and service provider just call **1300 SPLICE**

Because at the end of the day we want Jason and everyone else home safe with their families.
