

“Training in a league of its own.”

Craig Hemmingway,
Training Coordinator, Mackay

“Our training programs in Mackay are world class,” Craig Hemmingway says.

Under Craig’s guidance, trainees complete a full-time, eight week program of theory and practice, designed around nationally recognised competencies and qualifications.

The course covers belts of every kind – fabric, solid woven, steel cord.

Apex Fenner is the only Australian conveyor service company with the status of a Registered Training Organisation.

During the course safety comes first, all day every day – from job safety analysis, take five, managing heat stress, safe use of chemicals, to wearing Kevlar gloves when using knives.

Craig continually updates his knowledge of workplace incidents in the conveyor industry – and how to prevent them.

The technicians Craig trains typically work at your place, not ours. So they are responsive to your safety codes and needs, as well as what Craig has drilled into them.

Because at the end of the day we want everyone home safe with their families.
